Last Updated Monday, 25 January 2010

The team was started in Jan. 2006 as an extension of my own distributed computing efforts. It has since then grown from just myself, to members from all over the world. I do hope you enjoy wandering around our site. It is always in a state of upgrade. So come back often, stop in the forums, or just browse the news feeds. Some sections are only open to registered users. So please take the few minutes to register. Once registered you will have access to the private messaging system, and my favorite, PC Chess. You will also have access to other perks as well. And as always, we welcome you to our site, and would enjoy your company on our team if you are looking for a BOINC Team to join. We are in 30 projects. You can find which projects by going to the team links. Kick back, challenge someone to a game of chess. Or go hang out in the forums and start a topic.

Site Rebuild will be going on soon.
